## *Top Quality Pools Since 1969*

Renovations & Fibreglass Linings

You have this “hole” in the back of your garden and it has lost its “shine”, you no longer feel excited at the thought of your pool and dread having to maintain it.

We can change all of that for you and help rekindle the magic that once was. Whether you want to give your pool a face lift, make it smaller or change the design we can do it all for you. One of the advantages about being in business so long, is that we have learnt a few things along the way and I would say we know what we are doing.

We can take the dull and drab and turn it into the exotic !!!

Whatever the reason you choose to renovate, make sure you use a reputable company and qualified people that can carry out working from removing the old pool and installing a new one, to renovating and relining, for any pool renovation it is wise to enlist the services of a NSPI member.

Basic Guide to your quick and easy fibreglass lining:

1. We remove all the old paint, fibreglass, coatings and anything from the surface
2. We neutralize the structure by means of an acid wash and give it a thorough rinse
3. We cut a groove just below your coping to anchor the fibreglass
4. Inserting of fibreglass reinforcement and resin into groove for anchoring and sealing of fibreglass lining to existing pool structure
5. Application of a primer to the structure
6. Application of fibreglass and resins, and we roll it out so there are no bubbles
7. Lastly we apply a later of surface tissue and pool coat giving your pool that like New look and feeling

*With Imagination anything is possible*
